

IN THE SPECIFICATION

Please amend the specification as follows:

Please replace the paragraph beginning on page 2, line 20, with the following rewritten paragraph as follows:

-- **SUMMARY OF THE INVENTION**

In general, however, the mobile terminal is equipped with a small screen with a relatively small number of pixels. If, therefore, the monitoring camera can pick up clear images, one or more portions of the image required for monitoring the target site may be obscure on the mobile terminal, so that the target site may not be clearly checked. --

Please replace the paragraph beginning on page 3, line 1, with the following rewritten paragraph:

-- **SUMMARY OF THE INVENTION**

It is therefore an object of the present invention to provide an image display method for a mobile terminal in an image distribution system, and an image conversion apparatus and a mobile terminal using the method, which are arranged so that the required portion(s) of the monitored image to be viewed on the mobile terminal may be clearly displayed on the mobile terminal. --
